

Quartz Creek Culvert Replacements (Clearwater CD)

Program	Forest Roads, Bridges, and Culverts
Lead Implementer	Clearwater Conservation District
Funders	Idaho Water Resources Board, Private Party
Project Primary Contact	Tim Roehr (clearwater.swcd@gmail.com)
Project Stage	Completed
Duration	2019

Natural Resource Projects & Practices ➤ Forest Roads, Bridges, and Culverts

This project reduced the impacts of flooding on the Snake Creek Road, a major secondary road in Clearwater County. The Snake Creek Road provides access to private, state and federal lands managed for timber and year-round recreation. Prior to 2018, the Snake Creek Road experienced annual flooding including water over the roadway, as result of peak flows in Quartz Creek during midwinter thaw, spring run-off, and summer torrential rain storms. This project was developed in partnership with PotlatchDeltic,. The project replaced 21 culverts, including 4 arch pipes (49" to 81" span) and 3 open bottom culverts (72" to 114" span).

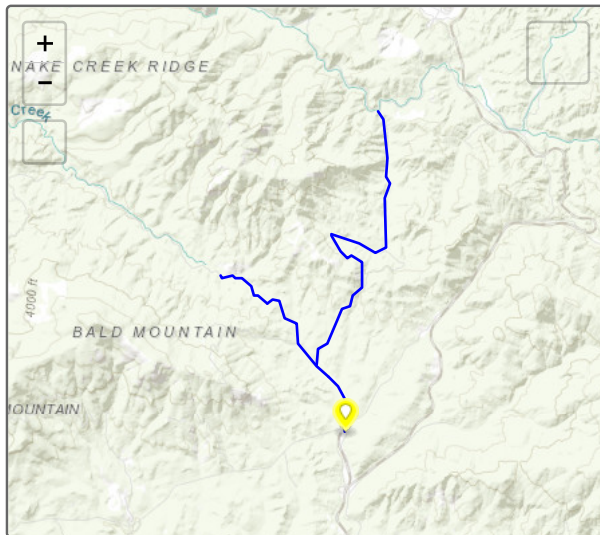

Key Accomplishments

- Fish Passage (number): 7
- Sediment Load Reductions - Riparian: 2,000.00 tons
- Stream Crossing (number): 21

Project Themes

- Water

Location

Replacement Culvert (72" open bottom arch) in Calhoun Creek

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
